# Find website security gaps before attackers do.

Continuous, authorized security checks for the websites your practice runs, with clear fixes and audit-ready evidence.

## The problem

Most practice websites have at least one gap: an expiring certificate, missing security headers, exposed files or spoofable email. Attackers find them automatically. Insurers and auditors ask for proof you're checking.

## How it works

### 1. Verify

Prove you own each website with a DNS record or small file, then sign the online authorization.

### 2. Scan

Safe, non-destructive checks: SSL/TLS, headers, email security, exposed files, risky ports.

### 3. Fix

Plain-English findings with evidence, exact fix steps, owners and due dates.

### 4. Prove

Retest to confirm fixes. Export executive and technical PDF reports for auditors and insurers.

## Plans

### Essentials

**\$100** /month

- 3 websites · monthly scans
- SSL/TLS & security headers
- SPF / DMARC / DNSSEC
- Risk score dashboard

### Professional

**\$200** /month

- 15 websites · weekly scans
- Exposed files & risky ports
- Owners, due dates, retest
- High-risk email alerts

### Complete

**\$300** /month

- 50 websites · daily scans
- HIPAA safeguard mapping
- AI fix guidance & exceptions
- PDF reports & audit trail

## Included: MediCRM Security Center

- Virus scan on every upload (MetaDefender Cloud)
- Lock controls & 15-min idle sign-out
- Daily SSL/TLS certificate monitor
- Patient Access Report (CSV/PDF)
- Intruder detection & attacker blocking
- Required two-step sign-in for admins
- Daily package vulnerability scan
- Weekly one-page Security Report PDF

## Sample findings

**CRITICAL** Remote Desktop (RDP) port 3389 open to the internet

**HIGH** /.env configuration file publicly downloadable

### What we don't claim

No scanner tests every possible weakness, guarantees protection or certifies HIPAA compliance. IP Security Scanner gives you an auditable workflow from authorized scans to verified fixes, as part of your compliance program.

**Start protecting your practice's websites today**
