

IP Security Scanner — Executive Security Summary

Prepared for Sunrise Family Clinic (SAMPLE) · October 16, 2026

Risk score	Critical	High	Medium	Low	Resolved
44	1	1	2	2	1

Scope

sunrisefamilyclinic.com — verified via dns; authorized by Dr. Ana Morales, Practice Owner; last scan 2026-10-16 (completed)

portal.sunrisefamilyclinic.com — verified via dns; authorized by Dr. Ana Morales, Practice Owner; last scan 2026-10-16 (completed)

Top priorities

[HIGH] Sensitive file is publicly accessible — portal.sunrisefamilyclinic.com. Remove the file from the web root or block it in the web server configuration, then rotate any exposed secrets.

[CRITICAL] Risky service exposed to the internet — sunrisefamilyclinic.com. Close the port at the firewall or restrict it to a VPN / known IP addresses.

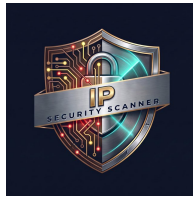

[MEDIUM] TLS certificate expires within 30 days — portal.sunrisefamilyclinic.com. Renew the certificate before it expires and enable automatic renewal.

[MEDIUM] Missing Strict-Transport-Security (HSTS) header — sunrisefamilyclinic.com. Add 'Strict-Transport-Security: max-age=31536000; includeSubDomains'.

[LOW] DMARC policy is set to 'none' (monitor only) — sunrisefamilyclinic.com. After reviewing reports, move DMARC to p=quarantine or p=reject.

[LOW] Missing Content-Security-Policy header — sunrisefamilyclinic.com. Define a Content-Security-Policy that limits where scripts, styles and frames may load from.

Limitations: these are authorized, non-destructive external checks of the listed domains only. They do not test every possible weakness, do not guarantee security, and do not certify HIPAA compliance. Failed or partial scans are labeled and are never treated as clean. HIPAA references show related safeguards and do not by themselves establish compliance.
